

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/abs-20-61	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	We will share our experience with delay techniques prior to nipple-sparing mastectomy; our series is the largest series to date describing this procedure and its utility, especially in high-risk patients. We can offer surgical expertise and our recommended protocol.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Recommended surgical protocol and operative technique.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Three years following the publication date, as techniques may continue to be modified over time.
7	To whom will you share the data?	Breast surgeons, surgical oncologists, plastic and reconstructive surgeons, medical/radiation oncologists, any specialists involved in the treatment of breast cancer patients.
8	For what type of analysis or purpose?	For the purpose of assisting other specialists involved in the treatment of breast cancer patients planned for nipple-sparing mastectomy.
9	How or where can the data/documents be obtained?	Emails may be sent to knini@psanj.com to obtain information related to the content of this study.
10	Any other restrictions?	We may balance the potential benefits and risks for each request in determining the amount and type of information to be shared.
